Summary

I am a detailed and innovative Product Designer with three years of experience in UI/UX Design and seven years of experience in Web design and development. I leverage my expertise in user research, system design and UX writing to design seamless interactions between the online platforms and end-users.

I am a highly self-motivated design aesthetics expert with tremendous time management techniques to deliver on tight deadlines.

I possess excellent interpersonal skills, am a strong team builder and am a natural leader.

Work Experience

First Medtrade Africa | Design Lead
Deceember 2020 - Present

1. Worked with the development team to ensure that the medical store met both the users' needs and the company's goals and objectives.
2. Optimized and created new designs for the medical store.

Felipe Gusta | UI/UX Developer (Remote)
January 2022 - March 2022

1. Converted the design of a reiki timer platform that was provided to code.
2. Ensured that the design, especially on mobile version, was up to par with the standards and the requirements of the client.
3. Ensured that the interface was not confusing to the users, and was very easy to use.

First Medtrade Africa | Web Developer/Administrator
December 2017 - November 2020

1. Developed, maintained and worked on the first version of the website.
2. Supervised the contract development team and ensured that the designs made on subsequent versions of the website were implemented as provided.
3. Ensured that the system/user interaction was bugs free and easy to use.

Akwa Ibom Ministry of Science and Technology | Intern
May 2017 - October 2017

1. Assisted the product design team with ongoing projects and website updates.
2. Designed wireframes, and prototypes for ongoing projects
3. Helped the team in preparing and organizing a 3-months training program.

Projects

SoliumRise | Visual/UI Desgner (Freelance)
November 2021

1. Provided sketches and implementable mockups for the design of a decentralized exchange landing page.
2. Designed the look and feel of the landing website for both mobile and desktop with daylight and night themes.
3. Worked to provide final prototypes and style guides for the development team.

The Victoria Nwaeke Cancer Foundation | Product Designer
September 2021 - November 2021

1. Worked to provide sketches and prototypes of the landing page design.
2. Converted the sketches to visual mockups and style guides for the development team.

Thrive.NIG | UI/UX Developer (Freelance)
August 2021 - September 2021

1. Worked to provide a saas (services as a software) web platform for the client.
2. Ensured that the mobile version of the platform was very easy to use and not confusing in any way.
3. Converted the final design to frontend code.

Club and Country | Web Designer/Developer (Freelance)
Deceember 2020 - January 2021

1. Designed and curated the implementation of the company's landing page.

CypressEnergy | Web Designer/Developer (Freelance)
December 2019 - January 2020

1. Designed and developed a saas landing page to showcase the company's services.

Nweke Cynthia | Web Designer/Developer (Freelance)
February 2019 - April 2019

1. Developed a simple cms for a school clinic management system.

Ugochukwu Kizito | Web Developer (Freelance)
July 2018 - August 2018

1. Designed and developed a simple vehicle license and offence booking system.
